Professor at Université Lille 1 / Institute of Electronics, Microelectronics and Nanotechnologies (IEMN)

Current position (since September 2016)

Professor at Université Lille 1 (France) and researcher at IEMN laboratory. My research activities mainly focus on microscale acoustofluidics that is to say subjects at the interface between acoustics, microfluidics and microsystems :

- **Design and physical study of microsystems based on surface acoustic waves for the control of fluids and particles at micrometric scales.** In particular we developed an acoustical toolbox based on the inverse filter technique and a transducer array that enables to perform many microfluidic operations with a single system. We also developed some selective, label-free, biocompatible, flat, easy to miniaturize acoustical tweezers based on interdigitated transducers and a holographic technique.
- **Study of the sound produced by microfluidic two-phase flows.** In particular we aim at improving the physical understanding of the sound produced by the rupture of liquid plugs in pulmonary airways due to obstructive pulmonary diseases. Such knowledge might greatly improve their diagnosis.
- **Multiple scattering of acoustic waves by dense suspensions of particles** both for the design of new acoustic materials but also the characterization of suspensions (spectroscopy).

Responsibilities

International

- | | |
|------|---|
| 2015 | Member of the organizing committee (5 people) of an international Summer School entitled “Microfluidics’15” , Porquerolles, France, 21 to 26 June 2015 (all courses in English, speakers from France, Germany, United States and Denmark) <ul style="list-style-type: none">— Organizer and chair of the short talk session— Organizer and chair of the poster session |
| 2012 | Member of the organizing committee (4 people) of an international workshop entitled “Acoustic waves for the control of microfluidic flows” , Lorentz Center, the Netherlands, 23 to 27 April 2012 <ul style="list-style-type: none">— Objective : bring together international experts of different scientific communities (physics of fluids, acoustics, microsystems) to improve our understanding of microfluidic actuators based on acoustic waves— 52 participants from 12 different countries |

- 2011 **Member of the organizing committee (3 people) of an international summer school entitled “Lab-based Workshop on bubbles and drops”,** University of Florida, 20 to 25 June 2011
- Funding : American NSF-PIRE program
 - Participants : 30 researchers, PhD students and MSc students from US, France and Japan

National

- 2011 **Member of the organizing committee (4 people) of a session on acoustofluidics at the 15th “Journée de la Matière Condensée”,** Bordeaux, 22nd to 26th of August 2016
- Since 03/2015 **Member of the “GDR Microfluidique” steering committee**
- 2011-2015 **Member of the National Board of French Universities (CNU)**
- Evaluation of the applicants for Assistant Professor qualification
 - Evaluation of the assistant and Associate Professors applying for promotions
 - Participation in the collegial decisions concerning the evolution of French Universities

Local

- Since 05/2015 **Member of the Mathematics department (UFR de Mathématique) board**
- Since 09/2014 **Director of undergraduate studies in mechanics** (125 students)
- Complete reorganization of the training in mechanics to obtain a more attractive, coherent and efficient program
 - Creation of partnerships with companies working in the field of mechanics (PSA - ONERA - NUMECA - CENAERO)
 - Daily management of the undergraduate studies in mechanics
- Since 09/2014 **Head of the Master of Engineering in Mechanics (CMI),** a selective program with additional activities to prepare students to the job of scientific expert in companies
- A Master of Engineering in France can obtain the CMI label only after examination of the project by a national commission. I developed the project with the help of the professors of my department and defended it to obtain the label
 - Organization of the additional activities

Current and past fundings

- 2016-2018 **Scientific coordinator of the SATT project “Acoustipince”,** a technology maturation program which aims at developing our patented acoustical tweezers in order to obtain a mature technology for commercialization.
- Grant from SATT du Nord / Amount : **315 k€**

- 2012-2016 **Coordinator (with the support of Pr. Olivier Bou Matar) of the ANR project "AWESOM"**, which aims at developing a Lab on a Chip based on hybrid technologies for the manipulation and characterization of biofluids
- Partnership between 5 French and Canadian institutes (IEMN / Université Lille 1, INSP / Université Paris 6, IJL / Université de Nancy, UMI-LN2 / Université de Sherbrooke, MSC / Université Paris 7)
 - Grant from the French National Agency for Research (ANR) / Amount : **532 k€**
- 2011-2018 **Obtention of 5 grants for PhD students working on my research activities** from (i) the Region "Nord-Pas-de-Calais", (ii) the French General Directorate for Armament (DGA), (iii) the University of Lille and (iv) the "Ecole Normale Supérieure"
- Total amount of the grants : **486 k€**

Supervision

Supervision of 5 PhD students :

- *Adrien Bussonière (2011-2014)* (50%)
 - Subject : "SAW microsystems for microfluidics : from physical understanding to biological applications"
- *Ilyesse Bihi (2012-2016)* (25%)
 - Subject : "Removal of microparticles from a surface due to interfacial and shear forces in two-phase flows"
 - Thesis prize "Pierre Isoard" from ASPEC Institute
- *Antoine Riaud (2013-2016)* (33%)
 - Subject : "Study of the potentialities offered by the synthesis of complex surface acoustic wave wavefields : focus on fluid actuation and contactless manipulation."
- *Juan Carmelo Magniez (2014-2017)* (75%)
 - Subject : "Two-phase flows in microfluidics complex networks"
- *Stéphanie Signé Mamba (2014-...)* (75%)
 - Subject : "From the dynamics of liquid plugs in synthetic microfluidics networks to the diagnosis and treatment of pulmonary obstructive diseases"

Supervision of 5 master students

Review of PhD, projects and papers

- 05/2017 **Grant review panelist for the ANR ASTRID**
- 10/2016 **Grant review panelist for the DFG** (German Research Funding Agency)
- 09/2016 **Reviewer of I. Bernard PhD thesis**, entitled "Manipulation of particles and generation of fluid vortices using surface acoustic waves in a microfluidic environment", Université de Grenoble-Alpes, France
- 12/2015 **Member of the jury of M. Costalonga PhD thesis**, entitled "2 exemples d'effets stationnaires dans des liquides vibrés", Université Paris VII, France
- 08/2014 **Reviewer of D.J. Collins PhD thesis**, entitled "Manipulation in microfluidics systems using Surface Acoustic Waves (SAW)", Monash University, Australia
- 08/2013 **Grant review panelist for the DFG** (German Research Funding Agency)
- 12/2013 **Member of the jury of T. Roux-Marchand PhD Thesis** entitled "SAW microfluidics systems : from DNA replication to PCR", Université de Lorraine, France

05/2013	Extern member of an appointment committee for an Assistant Professor position in "Fluid Biomechanics", UTC Compiègne, France
2008-...	Scientific content reviewer for peer-reviewed publications including : New Journal of Physics, Journals of Micromechanics and Microengineering, Sensors and Actuators B, Acta Acustica united with Acustica, Soft Matter, Langmuir, Journal of the Acoustical Society of America, Journal of Fluids Engineering, Lab on a Chip, Measurement Science and Technology, Proceedings of the Royal Society A, Advanced Functional Materials.

Honors and awards

2014	Front cover of "Soft Matter" journal (IF : 4,1) for our work on the controlled synthesis of armored bubbles. Our paper entitled "Capillary tube wetting induced by particles : towards armoured bubbles tailoring" has also been highlighted as one of the hot papers of the year.
2013	Distinguished by the national award for excellence in research (PES)

Education

2008	Postdoctoral fellow in microfluidics, Ecole Polytechnique, LadHyX — Subject : "Dynamics of liquid plugs in microfluidic networks" — Advisors : C. Baroud et P. Manneville
2004/07	PhD in Acoustics and Fluid Mechanics, Université Paris 6 — Delivered the 11th January 2008 — Thesis topic : "Nonlinear acoustics and multiple scattering in suspensions of rigid particles" — Advisors : F. Coulouvrat (d'Alembert) and J.L. Thomas (INSP)
2003/04	MSc in Fluid Mechanics at Université Paris 6 with First Class Honours
2001/04	MSc in Mechanical Engineering at ENSTA
1999/01	Undergraduate studies at lycée Lakanal and lycée Henri IV

International collaborations

Project ANR AWESOM (578 k€)	Countries involved : Canada, France Partners : Sherbrooke University, Canada (UMI-LN2) - Institut des NanoSciences de Paris (INSP), France - Institut Jean L'amour (IJL), France - Laboratoire Matière et Systèmes Complexes (MSC), France - Institut Jean le Rond d'Alembert (d'Alembert), France Role in the project : Coordinator (with the support of Pr. O. Bou Matar) Collaborations with : Alan Renaudin, Michel Grandbois, Paul Charrette (UMI-LN2) - Jean-Louis Thomas (INSP) - Philippe Brunet (MSC) - Arnaud Antkowiak, Régis Wunenburger, François Ollivier (d'Alembert) Shared publications [A9], [A10], [A12], [A13], [A14], [A16], [A19], [A20].
-----------------------------	--

Marie-Curie
IRSES euro-
pean program
(505 k€)

Countries involved : Russia, France, Japan, USA, Israel

Partners : University of Florida (UF), USA- Japanese Spatial Agency (JAXA), Japan - Technion, Israel - Tokyo University of Science (TUS), Japan - Bordeaux 1 University, France - Wave Research Center of General Physics Institute (RAS), Russia - Moscow State Institute of Radio-Engineering, Electronics and Automation (MSI), Russia

Collaboration with : Pr. Jason Butler (UF)

Role in the project : Participant

Mobility : 10 days at the University of Florida

Common publications [A15], [A17].

Publications and conferences

All the following publications can be downloaded at the following address :
